-2-

<u>Name of Place</u>	<u>Number of Installations</u>
Harsleben	120
Bitterfeld	40
Weimar	45
Altenburg	200
Zella-Mehlis	150
Fürstenwalde	30
Rheinsberg	650
Treuenbrietzen	100
Fildpark	120
Schwerin	100
Smaller Stations	170

3. The wholesale dismantling of cable lines in the eastern zone has occasioned a serious crisis in communications. In order to remedy this situation, the Russians have ordered the construction of a new communications net; wireless apparatus (decimeter waves) is to be used, since the shortage of materials makes a new cable system impossible. The necessary installations will be manufactured by the two AEG factories in Teltow and Bautzen and by the factory of Elmug in Chemnitz. These plants have been threatened with liquidation or expropriation if they refuse to accept the commissions. A secret order of the SMA instructs that all materials required for the construction of the new communications system are to be obtained exclusively from the Russian Zone.

25X1A [REDACTED] Comment: Some of the details in paragraph 1 duplicate information
25X1A already disseminated in [REDACTED]
